

Creator of all that was, is now and ever will be.

Look with mercy on our frailties; forgive our carelessness.

We ask for minds to share in Your wisdom, that we might NOW become good and faithful stewards of your beautiful creation.

We ask for hearts to imitate Your love, that we might NOW take up the cause of justice for our sisters and brothers who go without.

We ask for spirits to share in Your joy, that we might NOW work with leaders, organizations and communities to take action to end climate change.

For this, Father, we thank you.
